SUNLIT SEA

Optional sub-heading

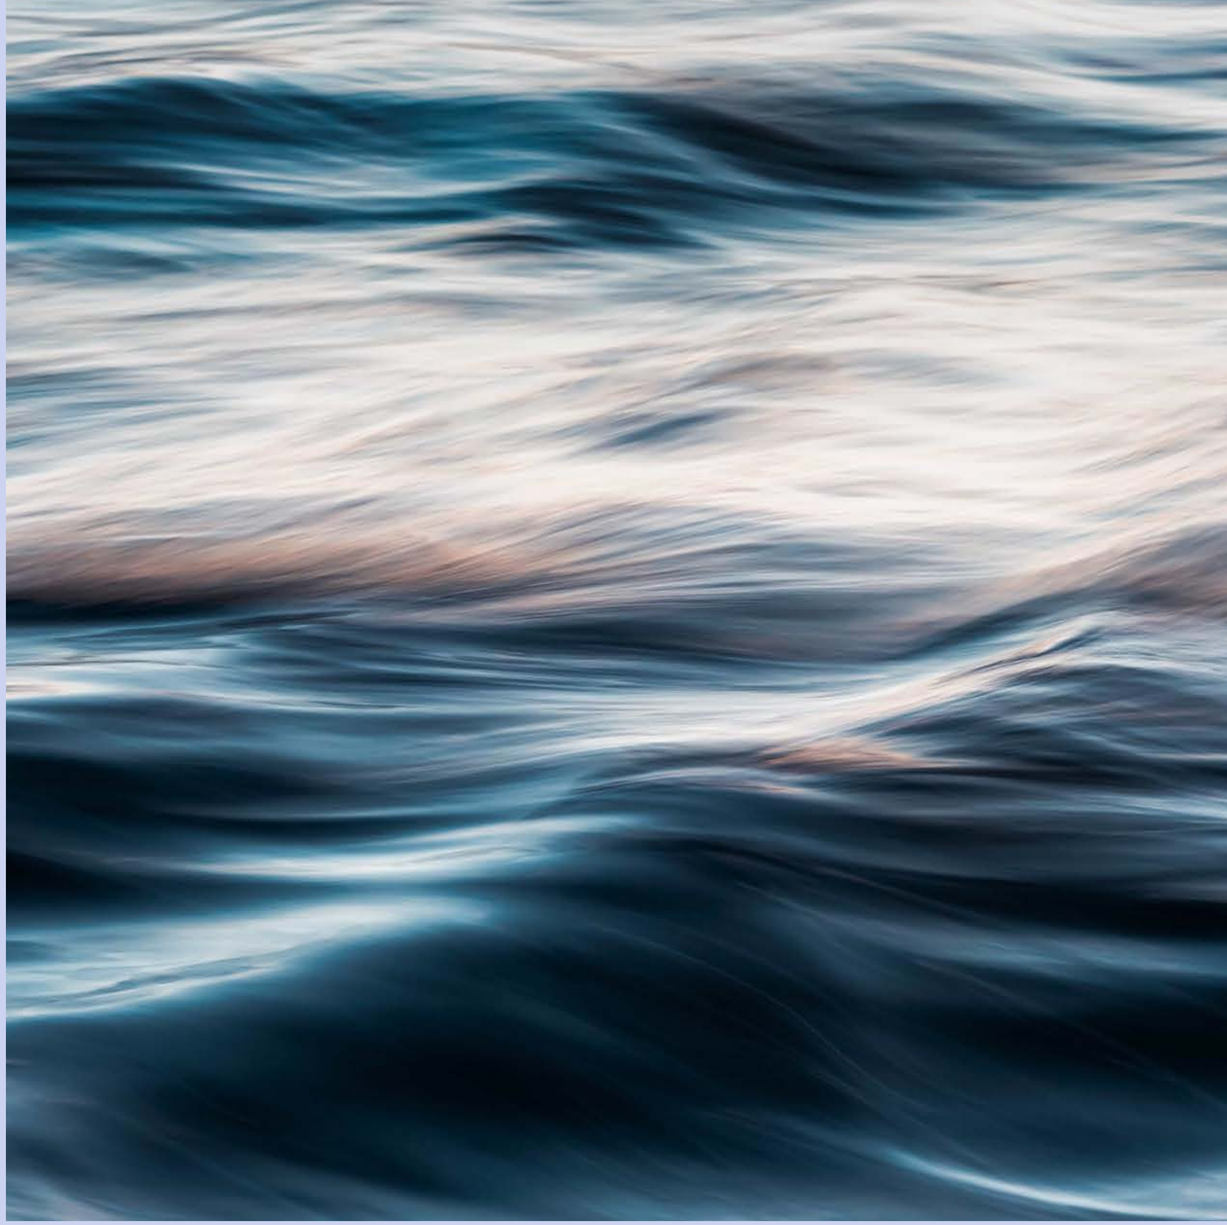

Revolutionizing ocean-based floating solar

SUNLIT SEA

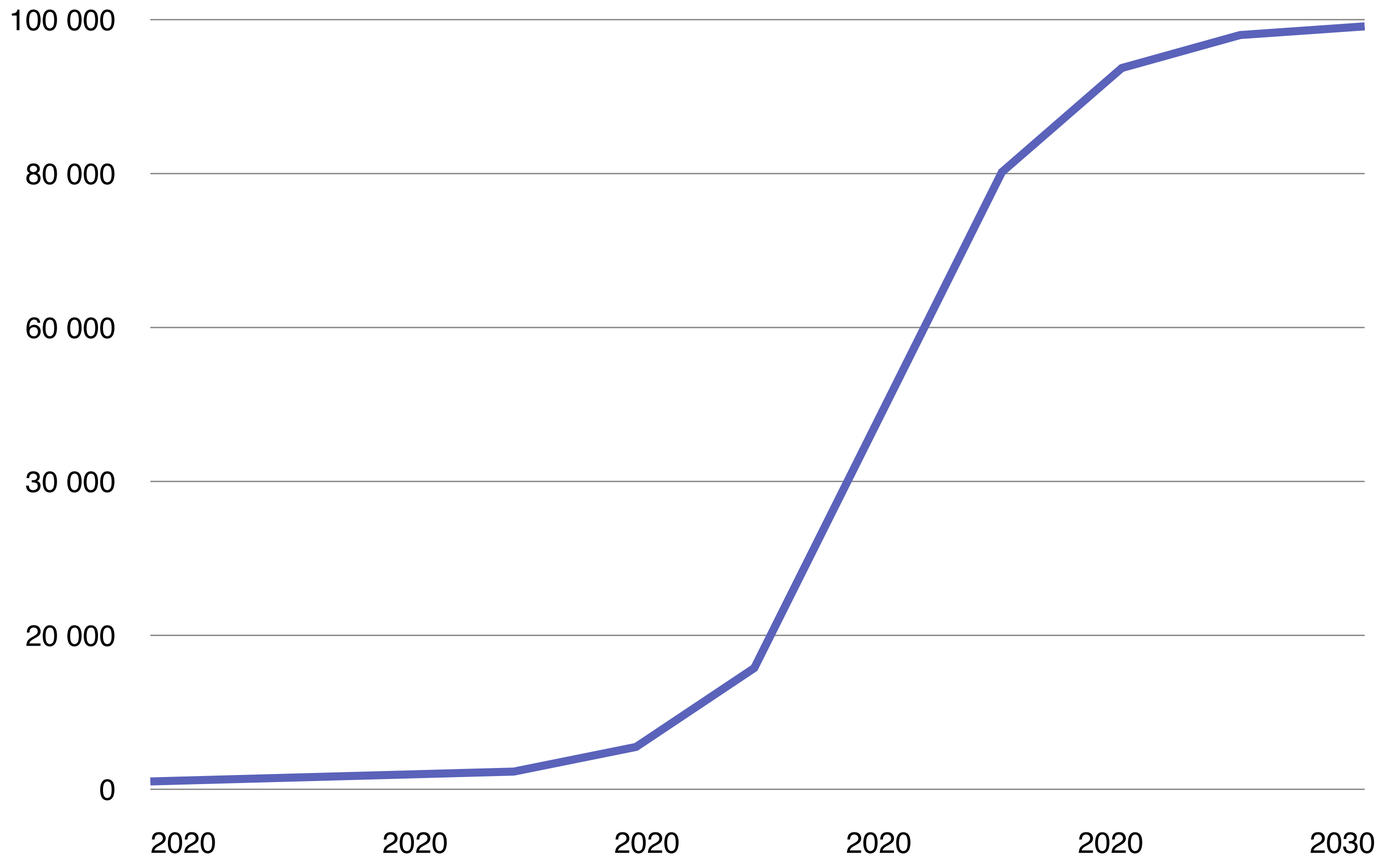

06 June 2020

Affordable and secure energy to all parts of the world

Financial

Our goal is to obtain 1 – 10% of the world's floating solar power market in 10 years. Given the value of our first installation, and the World Bank's estimate of a total market of $1000 billion in 10 years, this translates to an annual growth of 40 - 125%.

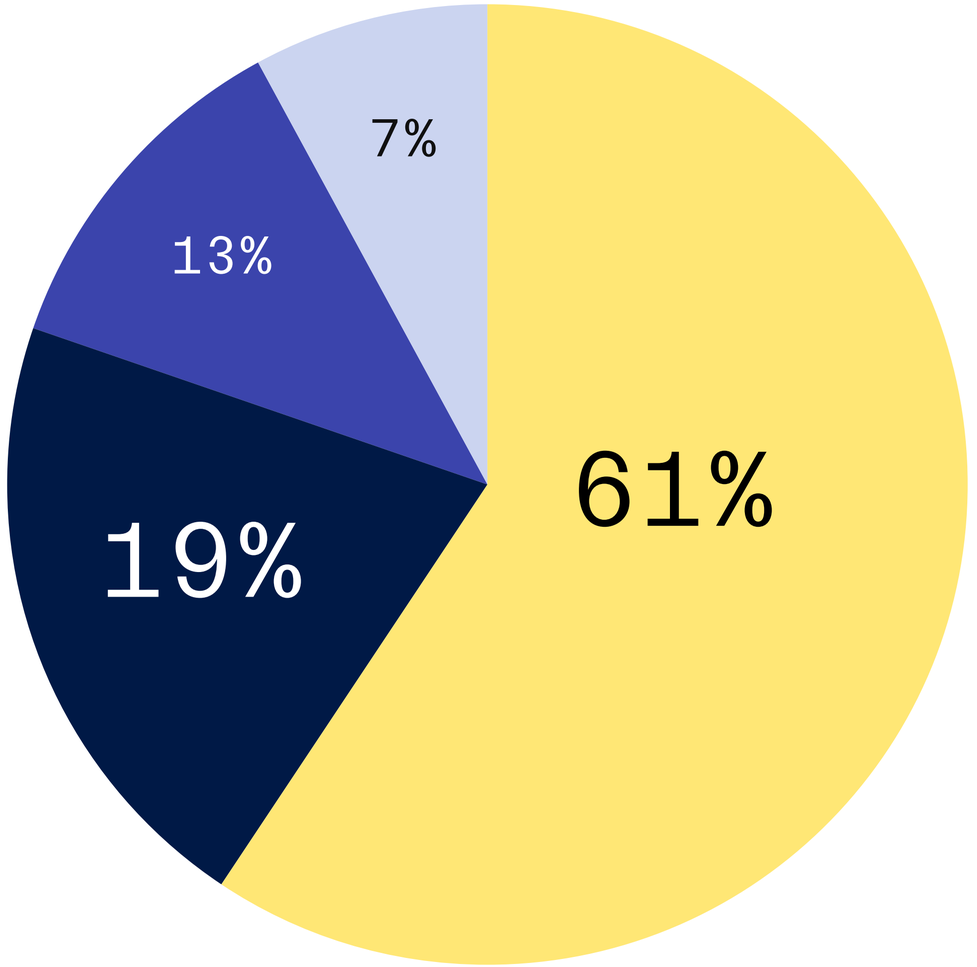

“If you get up in the morning and think the future is going to be better, it is a bright day.”

— Elon Musk

Markets

Our goal is to obtain 1 – 10% of the world's floating solar power market in 10 years. Given the value of our first installation, and the World Bank's estimate of a total market of $1000 billion in 10 years, this translates to an annual growth of 40 - 125%.
